High-Precision $\tan \delta$ / Power factor Measuring Instrument

■ The **2823** High Precision $\tan \delta$ / power factor measuring instrument is designed for measurement of very low dielectric losses of high-voltage apparatus.

HAEFELY HIPOTRONICS, the pioneer in high voltage testing since 1904, has been continuously developing and improving this product line since the first manual measuring bridge Tettex type-2801 was introduced in 1963.

Tettex brand, a part of Haefely Hipotronics, is worldwide recognized for the accuracy and reliability of our measuring instruments. The new 2823 belongs to our new generation of measuring instruments, which includes a perfect combination of more than 50 years experience in this field together with state of the art technologies.

The use of an optically decoupled connection allows complete galvanic isolation between control room and test field, and guarantees highest safety level of test personnel.

Additional information about this device can be found in our web page, www.haefely-hipotronics.com

FEATURES

- ☑ High accuracy: capacitance 0.1 % , $\tan \delta 5 \times 10^{-5}$
- ☑ Compact, reliable and EMC hardened design, IP50
- ☑ Optically decoupled from computer
- ☑ Up to 15 A input current with auto-range
- ☑ Extremely low input impedance
- ☑ Industrial measuring and fiber optic connectors
- ☑ Mains powered

BENEFITS

- The **galvanic isolation** fully ensures safety of the personnel. With the 2823, there is no electrical connection between the control room and the high voltage test room
- **Simple connection** to test objects without external shunts or hardware reconnections due to the high input current range
- **Increased** linearity and extended frequency measuring range up to 1 kHz.
- **Backwards compatible** with older instruments and cabling, same connectors used for over 40 years.
- **Turn key solution** from one supplier possible (including power supplies, standard capacitors, current comparators, test cells, certified calibration...).
- Connect and forget, No battery pack or recharge needed.

APPLICATIONS

Routine and type tests of:

- Generators and generators bars
- Bushings and isolators
- Instrument Transformers
- Bushings & isolators
